

Choose VASER® Lipo - The Next Generation of Body Contouring

New: VASER® Lipo	Old: Liposuction
Uses gentle, ultrasonic energy	Uses forceful suction
Tissue selective - preserves important tissue structures like nerves, blood vessels and collagen	Can cause tissue damage - unable to differentiate
Smooth, predictable results	Potential for uneven, "lumpy, bumpy" results
Minimal pain and fast recovery	Potential for long, painful recovery
Minimal swelling and bruising	Potential for swelling and bruising
Improved skin retraction reported	Potential for no significant skin retraction
Designed to precisely sculpt both common as well as delicate areas such as arms, chins and inner thighs	Elevated risk when treating delicate areas
